

The Safety 1<sup>st</sup> Clean™ standard is produced by the National Air Transportation Association (NATA) Safety Committee to provide general guidance on facility cleaning, disinfecting and facility operations in response to a pandemic. The goal of this standard is to safeguard FBO team members, clients, corporate assets and the general public.

The Safety 1<sup>st</sup> Clean standard also provides a self-certification process that allows FBOs to highlight their conformance to this standard by displaying the Safety 1<sup>st</sup> Clean logo.

Organizations may wish to promote their conformance with the Safety 1st Clean standard by utilizing the Safety 1st Clean logo in digital media, advertising, etc. **ONLY ORGANIZATIONS THAT COMPLETE ALL COMPONENTS OF THIS OPTIONAL SELF-CERTIFICATION PROCESS HAVE PERMISSION TO USE AND DISPLAY THE SAFETY 1 ST CLEAN LOGO.** Organizations wishing to complete the self-certification processes must complete all of the following steps:

- Complete the self-certification checklist found in Appendix A. The checklist must be signed and dated by the facility general or operations manager (or other equivalent title)
- Maintain a list of the cleaning and disinfecting products used to comply with this standard
- Submit a copy of the following to [safety1st@nata.aero](mailto:safety1st@nata.aero)
  - o Copy of completed self-certification checklist
  - o Copy of cleaning and disinfecting product list
  - o Organizations are not required to submit any confidential materials
- Maintain the documents provided to NATA and provide copies to any customer or client requesting them

Upon receipt of the required documents, NATA will provide confirmation that the organization is permitted to utilize the Safety 1st Clean logo. Such permission will be valid for 6 months, after which the organization will be required to resubmit the required documents.
